

In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in this application:

1. (Currently Amended) A cabinet comprising:
a top panel, bottom panel, two side panels, and a back panel, each of said panels having an inner and an outer surface; wherein the inner surface of the panels face an interior cavity of the cabinet and the outer surface of the panels form an exterior surface of the cabinet and wherein at least one each of said top, side, and bottom panels include a groove; and
edging material having a projection portion engaged with the groove of the at least one each of said top, side and bottom panels; and
wherein a first surface of the edging extends beyond the outer surface of the panel and at an angle to the outer surface to form engagement of said panels by said edging material forms an overhang with respect to the exterior surface of the cabinet over the outer surface of one or more of said panels and wherein the edging is substantially flush with the inner surface of said at least one panel panels.
2. (Currently Amended) The cabinet of claim 1, wherein said edge material is generally u-shaped having two legs connected by a middle portion and wherein the first surface of the edging is an end of one of the two legs.
3. (Currently Amended) The cabinet of claim 1, wherein said overhang extends between about 0.125 inch and about 0.5 inch beyond said at least one panel panels.
4. (Original) The cabinet of claim 1 further comprising one or more middle shelves.
5. (Original) The cabinet of claim 4, wherein said middle shelves include a grooved side and edging secured thereto.
6. (Original) The cabinet of claim 1 further comprising cabinet hardware mounted flush against the inner surface of said side panels.

7-14. (Canceled)

15. (Currently Amended) A cabinet comprising:

a set of cabinet panels ~~connected by biscuit joints, dowel rods, or a spline~~, wherein said set of cabinet panels form the structure of the cabinet, wherein said cabinet panels include an inner surface that faces an interior cavity of the cabinet and outer surface that forms an exterior surface of the cabinet; and

edging secured to one or more of said set of panels, wherein a first surface of said edging extending extends beyond an the outer surface at an angle to the outer surface of said one or more of said set of panels ~~but~~ and wherein the edging is substantially flush with the ~~not beyond an~~ inner surface of said one or more of said set of panels.

16. (Currently Amended) The cabinet of claim 15 wherein said edging has a recess formed therein for engaging a ~~recess~~ projection formed along an edge of said one or more of said set of cabinet panels.

17. (Currently Amended) A cabinet comprising:

a set of cabinet panels that form the structure of a cabinet; and

edging secured to a side of one or more of said panels, wherein substantially an entirety of a first surface of the edging extends beyond the structure of the cabinet at an angle to an exterior surface of the cabinet,

wherein said cabinet structure has slack such as to allow the structure of the cabinet to be manipulated to conform to the surface on which the cabinet is to be mounted.

18. (Original) The cabinet of claim 17 wherein the edging forms a front face of the cabinet structure, wherein said front face is flush with the interior surfaces of said cabinet panels.

19. (Original) The cabinet of claim 17 further comprising cabinet hardware mounted flush against one or more inner surface of said set of cabinet panels.

20. (Currently Amended) The cabinet of claim 17 wherein said edging is secured to said side of one or more of said side panels by a ~~set of corresponding grooves, one~~ groove in said edging

~~engaging and one groove~~ a projection in said side of said one or more of said side panels.

21. (New) The cabinet of claim 17 wherein the angle between the first surface of the edging and the outer surface of the cabinet is obtuse.

22. (New) The cabinet of claim 17 wherein the angle between the first surface of the edging and the outer surface of the cabinet is acute.

23. (New) The cabinet of claim 17 wherein the angle between the first surface of the edging and the outer surface of the cabinet is approximately ninety degrees.

24. (New) The cabinet of claim 15 wherein the angle between the first surface of the edging and the outer surface of the cabinet is obtuse.

25. (New) The cabinet of claim 15 wherein the angle between the first surface of the edging and the outer surface of the cabinet is acute.

26. (New) The cabinet of claim 15 wherein the angle between the first surface of the edging and the outer surface of the cabinet is approximately ninety degrees.

27. (New) The cabinet of claim 1 wherein the angle between the first surface of the edging and the outer surface of the cabinet is obtuse.

28. (New) The cabinet of claim 1 wherein the angle between the first surface of the edging and the outer surface of the cabinet is acute.

29. (New) The cabinet of claim 1 wherein the angle between the first surface of the edging and the outer surface of the cabinet is approximately ninety degrees.
